ENGINEERING SERVICES

- Product Development
- 3-D Mechanical Design
- Electromechanical Packaging
- Data Management
- CAD Translations
- Dedicated Back-Office

Realize your dreams without the expense of a full-time design team.

SIMPLIFY

Most successful companies rely on engineering service providers, such as Art Of Byte, to design their products while they concentrate on innovation and marketing. At Art Of Byte we start with your idea and prepare your product for delivery to your customer. We extract the power of Catia and pour it in our design, so your products are smart, easily modifiable and ready for the next phase.

SMART DESIGN

Design for manufacturing is a well known formula that we apply to our designs. We virtually test all design components for manufacturability by incorporating industry standards, tooling and assembly considerations. The end result will make

your product easy to assemble from day one without costly engineering changes late in the delivery process.

ORGANIZE

As your company grows, we will assist you with simple data management needs. A fully functional and secure database gives you access to your data at all times. We will assist you with the life-cycle of your product from your initial patent application, through design, engineering, manufacturing, distribution, servicing and discontinuance of your product. Years of information stored in one location.

ADAPTABILITY

Take CAD Translations to the next level. Batch processing your translation may be a quick but expensive fix and the results are usually less than satisfactory. Bring your live parts to Art Of Byte for smart translations, a proprietary process involving real humans. We will ensure your translated designs are easy to modify, just like the original, even if we have to go to greater lengths and completely redesign that component.

Small or big, rely on Art Of Byte as your back-office and/or design team.

BUSINESS SERVICES

- IT/CAD Assessments and Implementation
- Design Automation
- Software Training
 - Content Delivery
 - Content Development
 - Standard and Personalized Training
 - Fixed or Flexible Schedule
- Program/Project Management
- Management Consulting
- Business Expansion/Relocation

Prepare your business for the big leagues. Art Of Byte is your high-performance trainer and companion in CAx (Computer Assisted Design, Manufacturing, Engineering), PDM (Product Data Management) and PLM (Product Life Cycle Management).

EXCEL

With assistance from Art Of Byte your IT/IS department is at the forefront of technology. Make the best use of existing resources. Integrate what you already have with what you need. Ensure your limited budget is used rationally by matching the right software to the right workstation and the right people.

KNOWLEDGE

Automate your design. Why re-invent the wheel when you can regroup your products in families? With one click, the next member of the family is born.

Reuse the knowledge acquired by your company and make it work for future products.

EXPERTISE

Your employees are a reflection of your company. Maximize their capabilities with on-going training. Art Of Byte delivers training in full-days, half-days, evenings and weekends, helping your employees gain an advantage while keeping up with their daily tasks.

Choose from standard classes or customized training. We provide training with original software manufacturer licenses and materials or with existing materials your company already has. When the needs arise we can develop your training materials to include your company and industry's best practices. Assign an Art Of Byte employee for your on-the-job training for the day, week or for the quarter.

POWER

Let us manage your project with our expert personnel by keeping projects on track, on budget and on time.

EXPAND

Find a new location for your business expansion. Rely on Art Of Byte to develop your business at the new location so your new asset becomes productive as soon as you open it.

SOLUTION ARCHITECT

- PLM
- CATIA
- ENOVIA
 - SmarTeam
 - LCA
- DELMIA
- 3DVia

Art Of Byte is your Solution Architect for advanced in CAx (Computer Assisted Design, Manufacturing, Engineering), PDM (Product Data Management) and PLM (Product Life Cycle Management).

GROW

Leverage your existing investment in CAD, CAM and CAE by upgrading to CATIA the standard of excellence in Computer Assisted Engineering. Our expert Solution Architect will meet with you to evaluate and suggest a solution. You may choose to buy the software or rent it for the time you need it. Once a solution has been agreed upon, we will take care of your implementation from initial license ordering to software installation and maintenance.

CATIA

Catia is the world's leading solution for product design excellence. It addresses all manufacturing organization from OEM's through their supply chains, to small independent service providers.

ENOVIA

Enovia delivers new levels of 3-D digital collaboration in companies large and small and allows companies to fully master the creation and life-cycle management of products whether they are complex or simple. Choose between SmarTeam or LCA depending on your size and future ambitions.

DELMIA

Delmia is the key enabler for delivering a digital manufacturing process environment to optimize production systems and processes.

3DVia

Write your own instruction manuals, process planning or customer help tricks on paper or electronically. Materials will be fully integrated with your product development and linked to the latest revision with real-time updates.

TECHNOLOGY SOLUTIONS

- Network Integration
- Certified Workstations
- Printer/Plotter Recommendations
- CAD Accessories

NEEDS

SOFTWARE – At Art Of Byte we specialize in CATIA, the most powerful engineering software on the planet. Major OEM's are using Catia for their daily design. Shouldn't you do the same? Aim higher and be compatible with existing or potential customers, while being ahead of the competition. Invest in Enovia (SmarTeam or LCA) for an integrated product life-cycle management that includes files created in standard business applications, such as MS Office or Catia. Run Catia on UNIX or Windows certified workstations.

HARDWARE – Art Of Byte is the perfect place to acquire all your technology needs. We have partnered with major technology providers to deliver the best technology there is. They do their part in designing the best workstations compatible with your CAX software, and we recommend a platform for your specific requirements and build on it, adding certified hardware and an appropriate operating system.

Because we specialize in CAX, we look at your workstation from a designers perspective, providing you with personalized equipment to accomplish your tasks.

PERIPHERALS – Choose to improve productivity by at least 21% with dedicated CAD peripherals. For a full time CAD designer this can amount to over \$10,000 a year. Invest little and reap the rewards!

INTEGRATE

Make sure your new technology investment works best with your existing infrastructure. Choose from advanced CAX Certified systems. Integrate with existing resources and ensure your pieces work together flawlessly. Your IT/IS foundation is safe and sound with solutions provided by Art Of Byte.

COMFORT

All of your engineering department needs in one location. We offer certified workstations and output devices such as wide-format printers or specialized input devices, such as 3-D mice. Give your employees the best equipment to be productive and enjoy the work. Comfort for you! Economies for your company!

PLACEMENT

- Permanent/Full-Time
- Part-time/Temporary
- Contracting Services
- Design Engineer Certification

EXCELLENCE

Art Of Byte provides the most qualified designers and design engineers, on a part-time or full-time basis. Our professionals have the skills, experience, advanced tools and top level methodologies to ensure design modifiability and data quality. We continually invest in our people to keep them updated on the latest design technologies and processes so they can face the most challenging designs with speed and quality.

PARTNER

For those times when you are really busy, supplement your workforce with Art Of Byte personnel. Already trained and able to hit the ground running, our personnel has the ability and adaptability required by modern design tasks, ranging from automotive

and manufacturing, to aerospace and consumer products.

ADVICE

When you want to hire your new designer, ask Art Of Byte to certify his or her CAD skills; send us your top three choices, we will test them and make our recommendations; or send one and we will recommend the training they may need.

COMPATIBILITY

We guarantee the CAD and PLM training to the personnel we supply. We can do this because we know we trained them or supplemented their training to maximize their compatibility with your company. When you choose to hire them directly, our fee includes required training. Or choose to hire them as temps and account for at least two weeks of yearly training in addition to their vacation. Either way you make the right choice and the right investment.
