

Art of Byte Ltd.  
Windsor, ON, Canada

## NEWS RELEASE

FOR IMMEDIATE RELEASE – July 21, 2008

### ART OF BYTE BECOMES SELLING AGENT FOR DASSAULT SYSTEMS SOFTWARE SUITE

Art of Byte Ltd., a regional leader in Mechanical Design, Training and Consulting with Catia, today becomes an authorized agent in selling the specific Dassault Systems (DS) suite of software products, which includes CATIA, DELMIA, ENOVIA and 3DVia.

The move will improve support for local and regional OEM, manufacturing and engineering services customers requiring state-of-the-art mechanical design software and the related services: Training, Support and Consulting.

“This is a strategic partnership” – says Julian Bejan, President of Art of Byte – “not only for our Company, but for the whole community. After long negotiations, we are now able to connect local businesses with the software manufacturer for almost everything in Dassault’s portfolio: sales are now local, installation is local, training is local.” “Our customers – present and future – need not travel to Toronto or cross the border to Detroit anymore.”

The partnership also enhances the quality of local intensive Catia training, with original Dassault Systems training materials and expanded software licensing, building on the existing expertise Art of Byte already has: Catia Certified Professional instructors with over 6 years of training and coaching experience for international customers.
